Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of the Claims:

1. (Previously Presented) A headset comprising:

a receiver to receive a display command through a wireless <u>Bluetooth</u> link, including to receive a compressed bitmap file for a video frame; and

a processor coupled to render an image according to the display command, including to decompress the bitmap file for the video frame.

2. (Original) The headset of claim 1, wherein the headset includes a monocular display to display the image.

3. (Original) The headset of claim 2, wherein the headset receives the display command from a server to change an image displayed on the monocular display.

4. (Cancelled)

5. (Cancelled)

6.   (Original) The headset of claim 5, wherein the processor decompresses the bitmap file in accordance with a Motion Pictures Experts Group (MPEG) protocol.

7.   (Original) ~~The headset of claim 1, wherein the wireless link includes a Bluetooth-enabled link.~~

8.   (Previously Presented) A computer-readable medium having stored thereon a set of instructions to translate instructions, the set of instructions, which when executed by a processor, cause the processor to perform a method comprising:

a headset receiver receiving a compressed display command through a wireless <u>Bluetooth</u> link, including receiving a compressed bitmap file for a video frame; and

a headset processor decompressing the compressed display command, and displaying an image according to the display command, including decompressing the bitmap file for the video frame.

9.   (Original) The medium of claim 8, including a headset mounted monocular display displaying the image.

10.   (Cancelled)

11.   (Original) The medium of claim 10, including the headset processor

decompressing the compressed bitmap file in accordance with a Motion Pictures

Experts Group (MPEG) protocol.

12.   (Previously Presented) A method comprising:

a headset receiver receiving a compressed display command through a

wireless Bluetooth link, including receiving a compressed bitmap file for a video

frame; and

a headset processor decompressing the compressed display command,

and displaying an image according to the display command, including

decompressing the bitmap file for the video frame.

13.   (Original) The method of claim 12, including a headset mounted

monocular display displaying the image.

14.   (Cancelled)

15.   (Original) The method of claim 14, including the headset processor

decompressing the compressed bitmap file in accordance with a Motion Pictures

Experts Group (MPEG) protocol.
